As a Computer Science student with a passion for creative problem-solving, I've discovered a deep interest in UI/UX design, graphic design and frontend developer during my internship as a graphic designer and game developer. I am eager to embark on a career in UI/UX, graphic design and frontend developer, leveraging my technical skills and creative flair to craft visually appealing and user-centric solutions. I hope become a frontend developer to gain some experience and learn some things new to improve myself and show my value to the company.

Experience

SEPTEMBER 2023 – JANUARY 2024

Graphic designer | GLOBIVIO | Johor Bharu

- Working with the clients to develop the overall look and design poster, logo, and post.
- Design the website based on the requirement of the clients using Figma
- Ensuring the websites are accessible across many platforms such as laptops, smartphones and tablet.
- Write and learn some reusable code such as HTML, C++, and JavaScript for the website
- Collaborate with the team to understand the project requirement and create the user interface
- Created illustrations using Adobe illustrator tools such as button and decoration for the websites
- Researched the background of the current client and design a suitable and attractive poster and logo.
- Learn the flow of the video and edit the video based on the requirement of the client.

MARCH 2023 – AUGUST 2023

Graphic Designer intern | Gogokids technologies Sdn Bhd | Kuala Lumpur

- Applied best practices when designing user interfaces for mobile applications.
- Learned client's branding guidelines and applied them accordingly in design work.
- Worked closely with other designers, writers and creative directors on a wide range of project types.
- Researched current design trends to ensure designs are up-to-date.
- Designed logos, brochures, posters, and other digital media content.
- Created illustrations using Adobe Illustrator tools to meet specific project needs.
- Write clear, attractive title and content for the post in the XHS.
